

CROSSFIELD CHRONICLE

VOL. XXIII. No. 20.

CROSSFIELD, ALBERTA, JUNE 5th, 1930

PRICE 1.50 A YEAR

When the Price of Wheat Drops!

When the price of wheat drops or the crop yield is disappointing, it is a hard blow to the exclusive grain farmer. When the same thing happens to a mixed farmer, he can afford to smile. He loses part of his grain profits, but his cows and hogs will turn him a good living and pay his debts until another harvest.

This has been proved so many times that it is a small wonder people are turning to dairying as a financial independence. Look at Western Canada. The three prairie provinces of Manitoba, Saskatchewan and Alberta received last year \$67,730,551.15 for butter, cream, cheese and other dairy products. That is a lot of money and it went to those western farmers who raised cows.

The sale of milk, cream, butter and cheese is assured the year round. The price paid for dairy products are always high enough to assure the farmer a profit. In winter, when money is needed most, the price for dairy products are uniformly high.

One of the secrets of successful dairying is found in the cream separator. A good one will earn money with every turn—but a poor one will lose it just as fast. If you are now operating an old cream separator that is pretty well worn, you should have your skin milk tested at the creamery. You may be surprised to find that you are losing cream every day.

A McCormick-Deering ball-bearing cream separator will pay for itself quickly on the average farm. IT GETS ALL THE CREAM—it is the easiest running machine in the world...it is easy to keep clean.

BEST OF ALL—it is easy to own. See us and learn how simple it is to use a McCormick-Deering cream separator while you pay for it. A demonstration right in your home will cost you nothing.

OBITUARY

MRS. H. J. HEYWOOD

Residents of the town and district were shocked on Tuesday morning to hear of the sudden death of Mrs. Hannah Jane Heywood. Mrs. Heywood had retired for the night in her usual good health, and was found dead in the morning, having passed away peacefully during the night.

Dr. Whillians, coroner was called, but he decided an inquest unnecessary, as death was due to natural causes.

Deceased was the widow of the late Zacharias Heywood, who died in 1919. Mrs. Heywood was born 72 years ago in Belvidere, Illinois. Together with her husband and family, she came West in 1910, and had resided in the Crossfield district ever since.

The late Mrs. Heywood is survived by four sons, John, Arthur, Ernest and Ira, all of Crossfield; four daughters, Mrs. C. Christensen, of Crossfield, Mrs. W. Totz, Mrs. A. B. C. Birten and Mrs. C. Ford all of Belvidere.

The body was forwarded to Belvidere on Wednesday evening, the train, under the direction of Armstrong's funeral home. Mr. Ira Heywood and Mrs. C. Christensen accompanied the remains.

The body was forwarded to Belvidere on Wednesday evening, the train, under the direction of Armstrong's funeral home. Mr. Ira Heywood and Mrs. C. Christensen accompanied the remains.

Board of Trade Meeting and Luncheon June 13

The regular monthly meeting and luncheon of the Board of Trade will be held in the Oliver Cafe, on Friday, June 13th at 7 p.m. As many as possible are asked to attend as there is much business to be done.

TOWN COUNCIL TO IMPROVE STREETS

The regular meeting of the Village Council was held in the Secretary's office on Monday evening June 2nd.

The Council decided to have the fire hall painted; also to have more gravel put on the streets. The municipal grader will be secured and all streets that need it will be graded up again.

Over 50 trees have been planted in the park by the town this spring, and the north-east corner cleared of couch grass and planted to trees, which has made a big improvement to the appearance of the park.

McCool Addressed Meeting at Balzac

R. M. McCool, U. F. A. candidate addressed a largely attended meeting on Monday evening at Balzac. Mr. McCool explained at some length the work of the Brownlee administration and answered opposition criticism regarding the increase in capital debt and expenditures from current revenue.

Mr. O. E. Jones of Crossfield, Mr. C. E. Hobach of Airdrie and Mr. Sterling of Calgary, also gave short addresses supporting the Brownlee Government and Mr. McCool the local candidate.

Gazeley Brothers Land 54 Trout

Gazeley and his brother P. J. of Calgary, returned on Sunday after a day's fishing trip spent out west of here. They were successful in catching 54 speckled trout. Guy brought us a mess of these speckled beauties and they were lovely. We believe Guy is the best fisherman in the world and we hope he goes fishing often.

Crossfield Now on Top of Rosebud League

Crossfield continued their winning ways yesterday with a 7 to 3 over Innisfail. Lee pitched stellar ball and was given good support. This wins puts Crossfield at the head of the league, with six wins and one loss. The second game played at Innisfail was an exhibition game and ended in a tie, with a score of 7 to 7. Eaton pitched winning ball for the locals, but was given ragged support.

Innisfail plays a double header here on Wednesday, June 11, at 3 p.m. and 6 o'clock.

Olds plays here on Friday, June 6th at 7 o'clock.

Crossfield will go to Drumheller to play a double header on Sunday, June 8th.

Premier Brownlee to Speak at Cochrane on Friday, June 6

Premier Brownlee will address a public meeting in the Orange Hall, Cochrane on Friday afternoon, June 6th, at 2.30 p.m. R. M. McCool, U. F. A. candidate will also address the meeting.

The next regular meeting of the Provincial U.F.W.A. will be held at home of Mrs. Verne Thompson on Wednesday, June 11th at 2.30 o'clock.

Walter Major has commenced the erection of an addition to his home on Nanton Street.

Mrs. W. A. McCrimmon spent the week-end visiting friends at Okotoks.

Keeping Pace With Progress

Are we keeping pace with progress? Progress is an illusory thing. It may be seen, but so often is not perceived. Like old age or a thief in the night, it creeps upon one unawares and suddenly one awakens to realization that some profound change has taken place, an evolution has occurred. We have not been aware of the fact because of its apparent insidiousness—because its movement towards and past us has been gradual. We have seen it unconsciously but it has been too close to us for observation.

Yet despite this seeming slow approach the thing that we call progress moves with great rapidity, but it moves continually, inexorably, a step at a time, but never halting! It is an onward march that never tires, never falters.

The only way to correctly gauge progress is in retrospect. Look back a few years, only a decade or so, and the remarkable progress which civilization makes in the course of a brief span suddenly becomes apparent with startling clarity. Yet we do not see these extraordinary and far-reaching changes in the making although they are going on all the time.

Turn over the leaves of the family album and immediately the truth of the assertion stares one in the face. What an extraordinary change in style of dress, in shape of headgear, in fashion of hair dressing in a few years. It appears incredible that one really looked like that 20, 15 or even ten years ago.

But progress does not mark a changing trend in dress alone. It invades every realm of activity within the ken of human experience. In the whole field of things material and in the entire mental and even spiritual arena, a steady and unrelenting advance is being made.

Hark back but twenty years and compare the means of transportation of that time with the swift cabin monocle and upholstered limousine of today. Contrast the crude telephone of a generation ago with the automatic and the radio of the present time. Appraise the difference between the mired prairie trail of yesteryear with the broad gravelled highway along which we roll now.

A little reflection shows that everything with which we come in contact, everything we experience, everything we do has been subject to just as remarkable an evolution as those things to which specific reference has been made. Not only has progress made radical changes in what we wear and how we live, but it has also changed what it is that wrought a similar transformation in what we eat and drink, in our amusements, in our work, in our social life, in our worship and even in what we think.

In no sphere of activity, however, has this evolution been more marked in recent years as in the field of daily work, in the realm of business, in city and country. In methods of production, in modes of distribution, in processes of marketing changes have revolutionized and are continuing to revolutionize the daily life of the individual. These changes are so pronounced and so rapid that they are apparent even to the most careless onlooker.

A writer in a popular magazine recently pointed out that such swift changes are being made in the conduct of business and commerce that heads of business houses are finding it increasingly difficult to secure young men competent to engage in commercial life without first being re-trained after they have left college. The almost daily application of new scientific discoveries in the field of mathematics in the college student being out of date before the course, though designed for the particular vocation he intends to follow, has not kept pace with the changes taking place in the practical world.

This evolutionary process is going on in the whole industrial field, agriculture included, but as was stated at the outset it is not always so easy to perceive it because of its constancy and its proximity.

For this reason it is perhaps a wise thing, may, a necessary thing to sometimes pause and look back a little, make a few comparisons with the past, and in the light of these contrasts a clearer perspective may be gained of what is happening from day to day, and perhaps even an inkling may be secured of what may be expected in future.

Only by doing this can we secure the necessary vision to enable us to keep pace with progress.

Idea Did Not Work

Berlin Courts Fined Man For Fighting Noise With Noise

For trying to conquer the noise produced by his neighbor on the floor above by firing a few deafening noise, Walter Houser, a lodger in an apartment house of a Berlin suburb, was arraigned in court.

He stretched a violin string across his room immediately beneath the ceiling, and he belabored it several hours daily with a bow while standing on a stepladder. He then screwed several hooks into the ceiling, from which he hung his vacuum cleaner in the inverted position.

The court sentenced the ingenious noise producer to a fine of 200 marks and cost of the repair of the damaged apartment.

How He Saw It

Being told to write a brief essay on "The Most Young" Gregory compiled the following: "The mouse is a harder bird than the gun of the turkey. It has two legs, walks with, two more to kick with, and wears its wings on the side of its head. It is stubbornly backward about coming forward."

Let's Go Fishing

But not forget to take Minard's along. It will take care of cuts, bruises or mosquito bites.

Canada's Trade With Bermuda

Large Quantity Of Fruits And Vegetables Imported Last Year

The rise in exports of fruits and vegetables from Bermuda to Canada last year, from zero to 50,000 cases, one hundred thousand cases is the estimate for this year and three times that amount next year," according to Hon. S. S. Sparling, chairman of the Board of Agriculture, of Bermuda, who was a recent visitor. Mr. Sparling conferred with officials of the Canadian National steamships in regard to the Canada-West Indies service.

The Canadian budget will be of great benefit to Bermuda," he said, "since it permits the free entry of vegetables into Canada during the winter months."

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these intestinal parasites of the child and infant. It is an excellent worm destroyer, and when its qualities become known in medical practice in the province's history. Most of the seedlings are jack and quinny. Keep a bottle handy.

The Latest Convenience

Boxes for the mailing of letters are to be placed on buses running through rural districts in Ireland. These will be tried on four lines terminating at Belfast, where the boxes will be cleared and the mail handled through the Belfast post office.

Manufacturing On Prairies

Prairie Province manufacturers in 1929, had a value of \$34,000,000 according to C. E. Harvey, of Winnipeg, retiring chairman of the prairie division of the Canadian Manufacturers' Association.

Why Anglo-Egyptian Negotiations Failed

Britain Could Not Meet Demand For Immigration Into Sudan

A white paper published disclosed that the breakdown in Anglo-Egyptian negotiations which terminated in London, May 8, was due to the impossibility of finding any formula which would satisfy the Egyptian demand for unrestricted immigration of Egyptian natives into the Sudan.

The document shows that little difficulty was experienced in negotiations on most points, although there were long discussions regarding the defence of the Suez Canal.

At first the Egyptians demanded that the British troops should all be concentrated on the east bank of the canal. They subsequently agreed to the British stipulation for troops to the west of the canal but no agreement could be reached on the Sudan question.

Was Run Down

NOW WELL AGAIN

Takes Pleasure In Recommending Dr. Williams' Pink Pills

To the reader in the same illness as that which I am suffering is calamity; a man keeps on with her household duties when she is feeling ready to drop.

Her head aches, she is easily tired, her digestion is bad, her appetite is poor. In a word she is anaemic and badly needs help—the health-help that only Dr. Williams' Pink Pills can give her.

These pills are rich, red blood which brings new strength and energy to weak, dependent sufferers. Concerning them, Dr. Frank Hall, of New Haven, Conn., says: "I was badly run down, I took poorly, and awoke as tired as when I went to bed. My appetite was poor and I felt weak. I took six boxes of Dr. Williams' Pink Pills and my appetite completely renewed my health."

Dr. Williams' Pink Pills are sold at all leading drug stores and may be sent a box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Flags For Old

Fifteen Nations Have Made Change Since World War

Fifteen nations, containing more than one-third of the world's population, are living under new flags since the World War. In addition a new flag of red, white and green is now flying in India with its 300,000,000 people, where General Allenby declared Great Britain. In fact since the change of colors by Russia, Germany, China and other great political divisions the probability is that not more than four flags of major nations can be universally identified today.

Attacked By Asthma. The first fatal sensation of suffocation, within a few hours becomes despair and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. This remedy is the result of a determined attack is mastered. The asthmatic who has found out the dependency of this sterling remedy will never be without it. It is sold everywhere.

Engineer Will Survey Mines

Government Official To Visit All Important Centres During Season

Hon. Charles Stewart, Minister of the Interior, has announced that Supervisory Mining Engineer G. C. Ross was leaving for Fort Smith. Mr. Ross will visit all the important centres of mining interest throughout the country. He will examine the work of the office and the field parties and endeavor to ascertain the needs of the prospectors and companies. Mr. Ross will then be in a position to advise the Minister of the Interior fully on all that appertains to the future of the industry.

Fights Large Forest Area

A forest in the embryo—250 acres of it—has been planted by the Saskatchewan forestry service, in the Prince Albert region. H. P. Eisler, forestry engineer, stated that the transplanting of 2,000,000 nursery seedlings and stock is the largest forest planting in the province's history. Most of the seedlings are jack and quinny. Keep a bottle handy.

John D. Rockefeller has spent more than \$750,000,000 in benefactions during his long life.

London's statue to Marshall Foch is to be unveiled in May.

CORNS Stop Aching Drop Off USE PUTNAM'S Corn Extractor

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, all sorts of pains in women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

Artistic Booklet Issued By C.P.R.

Great Help To Traveller Planning An Overseas Holiday

A pleasing series of glimpses of "Those Magic Isles," embracing England, Wales, Scotland and Ireland, is contained in an artistic booklet under that title, just issued by the London offices of the Canadian Pacific Railway.

Replete with wealth of artistic photographic illustrations, the publication forms one of the most complete guides to the Old World, which has appeared in recent times. All aspects of the life of each country are dealt with, both in picture and story, from the teeming hub of Empire itself along the leafy lanes and hedgerows of England to the rugged shores of Wales and the mighty moors of Scotland. Ireland, both the Free States and the North, is given considerable space, while rural scenes and graphic descriptions of popular resorts are not wanting.

To the traveller contemplating a holiday overseas is an alluring forecast of what is to come; to the travel agent, it is a pleasant souvenir and an inducement to repeat the journey.

Former French Premier Has Great Faith In The Future Of Aeronautics

Giant trans-Atlantic aeroplanes hurtling through dizzy altitudes at terrific speeds, the passengers breathing oxygen supplied from special tanks, will soon make Paris less than 10 hours from New York, M. Paul Painlevé, former premier of France, told the United Press.

"Perhaps I shall live to see the day," said the 75-year-old former premier, "when these specially restricted planes will roar through the thin air at altitudes above 32,000 feet at speeds surpassing 300 and 400 miles an hour."

"When the technical problems for the construction of these high-altitude speed aerobats are solved, then will trans-Atlantic air service become a reality," Lindbergh's sole flight stimulated the solution of these difficulties and perhaps before I die, I hope aeroplanes at speed of 300 and 400 miles an hour high above both clouds, rain and tricky air currents will link Paris with North America."

Seated at his desk, littered with mathematical treatises and scientific manuscripts, M. Painlevé waves his hands at the bookcases which covered the walls from floor to ceiling of his study.

"In 1902 when I was well along in the study of those books and was beginning to do a little mathematical thinking myself, I realized that having this aerial flight was possible. Six years later Orville and Wilbur Wright came to France with their crazy air-machine. I knew it would fly, and it did. My six-year-old dream had come true and since then I have never lost my faith in aviation."

"Three years ago Lindbergh landed at Le Bourget. His flight was just as important as the first trial I made with Wilbur Wright in 1908. The world proved the plane could fly, and the other countries followed it with the world's best means of rapid transportation. Lindbergh set the best aviation experts of the world studying means of perfecting aeroplane motors and equipment. The Wright Brothers, Blériot and Lindbergh are a trio of names upon which aviation history stands."

The famous mathematician-politician declared they are only two certain methods of conquering the Atlantic by air. The first is by developing machines to fly in extreme altitudes, thus lessening resistance to air currents, speed, and decreasing danger through atmospheric conditions, and the second is to establish floating islands for use with present-type of aeroplanes.

Although Painlevé said he believed floating landing fields were feasible, he thought the future of aviation rested in flying high at terrific speeds. The machine would have to be constructed in such a manner to resist the unequal pressure, and both passengers and crew would have to be supplied with oxygen to breathe at such dizzy altitudes.

Six times M. Painlevé has been minister of war, and yet he is not convinced that the aeroplane is the most formidable unit for use in the next war, which Painlevé hopes will never come for at heart he is an ardent pacifist.

"Aeroplanes have their use in war," he said, "but they will not be so dangerous as many people like to believe. They are not gunboats being perfected which will make the average airman in the next war feel like a partridge under bombardment from a thousand shot-guns. No, the 'plane is more interesting to me for its commercial value."

"Any insanity in the family?" asked the insurance doctor of Mrs. Suffragist.

"Well, no—only my husband imagines he is the head of the house."

"Mary, I see you have drunk all my brandy!"
"Yes, sir, get over my shock!"
"What shock?"

"I broke the large mirror in the drawing room." — Paiges Gates, Yerdon.

W. N. U. 1840

Translation Was Difficult

Austrian Chancellor's Remark Did Not Lead Itself To French Language.

Chancellor Schober, of Austria, who has been visiting all the principal European capitals in succession during the past few months, had a curious adventure in Paris just before going to London. This adventure might be considered unimportant except that it illustrates how many language differences are due to different languages and different habits of thought.

Dr. Schober was asked by a Persian interviewer what his conception of Austro-German relations was. The chancellor replied: "I consider Austria and Germany as one people but two nations."

The interviewer, who understands German perfectly, applauded this definition, which emphasized Austria's determination to remain independent. But unfortunately, in attempting to translate the chancellor's words into French, he could not find the exact equivalents and made the statement read, "One nation but two states."

This precipitated a tremendous howl in the French Nationalist press and led Dr. Schober to issue a succession of statements in which he attempted to correct the false impressions but each statement led him into new pitfalls until he finally was obliged to elaborate his original epigram into the meaningless formula, "One civilization but two nations and two governments."

The Power Of Lightning

Man Cannot Produce Force Contained In Single Flash

When a great thunderstorm is raging we realize something of the stupendous powers of electricity, says an article in Tit-Bits. If a cat's back is rubbed in the dark during hot dry weather, sparks will often fly from it. The sparks are harmless, though they are identical with lightning flashes, and the crackling which accompanies them is due to a small scale. In a thunderstorm the earth repels your hand and the clouds are the cat's back. The pressure which causes a flash of lightning may be as much as 1,000,000,000 volts—5,000,000 times greater than that which is used for household lighting. Could we collect and harness the power set free by a single flash of lightning we should have at our disposal a force greater than anything which can be produced by man.

In a famous electrical laboratory there was tried the experiment of producing a million-volt spark. It leapt a ten-foot gap with a noise like the explosion of a bomb, and nearly wrecked the building. Most of the lightning in a thunderstorm does not approach near the earth, but flashes from cloud to cloud. Occasionally a fork tongue leaps from cloud to earth, and then anything in its path is destroyed.

Resents Removal

Of Indian Carvings

British Columbia Wants Valuable Work Kept In Canada.

There is great indignation at the wholesale removal of Indian carvings from British Columbia to the United States, says a letter received at the national museum, Ottawa, from an officer of the British Columbia government. At present there are a great many influential people who do not want any of the objects mentioned in the Indian act which the Indians carved grave monuments, carved rock inscriptions and paintings on cliffs and large boulders, removed from the province, the letter continues.

Commenting on the matter, the archaeologist at the national museum declared that recently a retired United States naval officer collected certain beautifully carved spindle whorls, formerly used by the Indians in spinning mountain goat wool, and took them out of the dominion while a representative of the national museum was searching for just such specimens.

Will Be Well Represented

Fifty-five cities in the United States and Canada will be represented at the fourth World's Poultry Congress which has been organized by the Governments of Great Britain and Northern Ireland, and a large number of the attending poultrymen will sail on the Canadian Pacific liner "Duchess of York" from Montreal on July 22, headed for the Crystal Palace, London, where the Congress will take place, from July 22-30.

A recently invented radiophone makes it possible to talk 200 feet underground and through solid stone.

Workmen's singing clubs are becoming popular in Germany.

New Vice President

George Stephen who succeeds W. R. MacInnes as Vice-President in charge of Traffic, Canadian Pacific Railway.

Poultry From E.P. Ranch

Prince Of Wales Will Exhibit At World's Congress

Birds from the ranch of H.R.H. the Prince of Wales, at Pekisko, near High River, Alberta, will be among the many interesting exhibits at the World's Poultry Congress, to be held at the Crystal Palace, London, England, July 22-30, 1930. An

other exhibit that is likely to attract attention will be the birds from the royal aviary at Windsor Castle. Canada has a particular interest in this aviary for among the birds are some

Canadian Barred Rock presented to His Majesty, King George V, by the Canadian Government following the second World's Poultry Congress at Barcelona, Spain, in 1924. This trio

was the finest that could be procured in Canada. An exhibit of 1,000 birds is being sent to the World's Poultry Congress from Canada.

One Way To Count Cost

Expenditure In Great War Would Have Built Many Garden Cities

The League of Nations reports the cost of the Great War at \$633,000,000,000 and 37,000,000 lives—that is four times the total population of Canada, not merely of lives, but of lives of selected men, competent in virtue of admirable qualities to meet the most terrible responsibilities that an imperfect civilization can place upon men. The cost in money would have built 181,000 garden cities according to the estimate of compensated living, the sordidness, the ugliness and the despair that breeds resentment, anger, broken homes, ill-bred children, crime and disease which would have had no seed bed for growth.

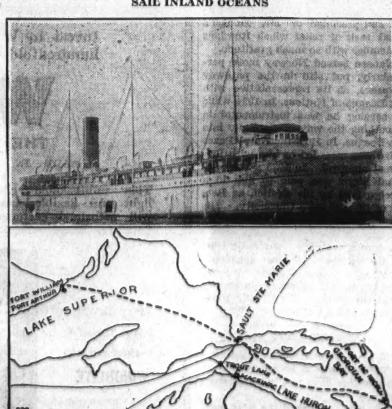

An All Canadian Firm

Beatty Brothers factory at Fergus, Ontario, has made a record shipment of laundry equipment sets—some 8,000 of them—over Canadian Pacific lines for various destinations.

It is pointed out that every item of the equipment was made in Canada and every official and employee of the company is Canadian.

Some specimens of the California fan palm reach an age of 200 years.

SAIL INLAND OCEANS

Passenger service on the Great Lakes is now opened for the summer season, and the three fine vessels of the Canadian Pacific fleet on these waters, S.S. Assiniboin, S.S. Keweenaw, and S.S. Manitoba, are now at the disposal of the public. Travellers wishing to vary the railway trip between Toronto and Winnipeg, are now able to make a pleasant change by taking ship at Port Arthur and sailing through Lakes Huron and Superior, via South St. Marie to Port Arthur and Fort William. At the latter point they tranship to the Canadian Pacific transcontinental train and continue their journey to Winnipeg and the coast. Lay-out shows S.S. Assiniboin, a fine vessel of 3,880 tons, and having accommodation for 260 first-class passengers, and sketchman of Great Lakes route.

Provinces Need Aid Of Federal Government To Build National Highway

Annual Agricultural Statistics

Every Farmer Asked To Fill In and Return Schedule

It is the custom of the Dominion Bureau of Statistics to co-operate with the nine provinces in taking a Dominion-wide census of important agricultural facts in June of each year.

The census takes the form of a simple cardboard schedule, distributed to individual farmers through the minister of agriculture, the teachers and pupils in seven provinces, and in Ontario and British Columbia through the rural post offices. The essential object is to reach every farmer and to encourage as many as possible to fill in and return the schedule.

The two main phases of farm production—the areas of field crops and the numbers of live stock—are covered by the form. The areas of field crops determined from the schedules are tabulated later in the season with the estimated area yield per acre, determining the total yield for the country. In the case of wheat, for instance, the importance of having correct estimates of acreage is thus made apparent. Although there are many estimates of anticipated production, most of these are based on the one official acreage estimate, which has been issued annually since 1917, by the Dominion Bureau of Statistics.

It is unnecessary to emphasize the very great importance of the accuracy of agricultural statistics, and it is with our hope to obtain a completed schedule from the great majority of Canadian farmers. The more numerous the returns received, the more reliable will be the estimates compiled from them. Much of Canadian economic enterprise depends to some degree on correct estimates of agricultural production in the making of their plans. If any farmer does not receive the card-and-pencil schedule by the middle of June, he should apply to his school teacher or the nearest rural school, his provincial Department of Agriculture, or to the Dominion Statistician, at Ottawa. Letters addressed to the Dominion Statistician require no postage.

Is Doing Good Work

Junior Red Cross Teaching Children To Avoid Disease

The number of deaths of children of school age would be "shocking" if we were not so accustomed to their daily and hourly occurrence. There is such a death every ten minutes. It is nothing short of appalling to study the statistics of the mortality and morbidity of our school age boys and girls. The tale is well known to story of death and disease can be best avenged by us as parents across the land. Dr. J. F. Rogers, Chief of School Hygiene Division, and Physical Education, Washington, has issued a sheet of figures that should be in the hand of every parent and school teacher.

Roughly speaking in the registration area of 103,000,000 persons, one child in every five hundred died in a year. A thoughtful reader will look with interest at the reasons for this class of the population. Particularly striking is it to spend days of speed traffic, to observe the figures for accidents and automobile deaths. Seven per cent. died from auto and 21 per cent. from accidents.

The doctor goes on to say that practically all the deaths from the following diseases were preventable, Typhoid, smallpox, diphtheria, dysentery, syphilis, rabies, tetanus. By better protection from infection tuberculosis would take a heavy toll. With the sick-care and more knowledge for prevention would die of measles and scarlet fever, whooping cough, etc. It was estimated there could be a certain saving of 5,000 lives a year, or thinking in terms of cents and dollars \$100,000,000.

There will doubtless be better machinery established for public health in the generations to come, and this reproach will be wiped away. Today among the foremost agencies in the field for the furtherance of a healthy citizenry is the Red Cross. Its far-reaching Junior Work has enlisted approximately 12,000,000 Juniors in the fight against disease and dirt.

A Navajo squaw would not think of making a perfect rug, for tradition says that blindness would follow such a deed.

Czecho-Slovakia's output of coal last year was one of the greatest in the country's history.

A complete trans-continental highway in Canada may be a somewhat remote possibility, but it is worthy of observation that it is now emerging in the attention of Members of Parliament from one end of the country to the other. In the recent debate on the subject such parliamentary leaders as Hon. Dr. Manion, Hon. Charles Stewart, Hon. Hugh Guthrie, Hon. Charlie Dunning, the Prime Minister, Hon. R. B. Bennett, Mr. Woodsorth and others indicated increasing concern for the scheme. In a memorandum supplied by the Royal Canadian Air Force, containing interesting information that there remains only some 330 miles of highway yet to be constructed, and he advanced the argument that as this was through unproductive provincial territory, it might well be expected that the Dominion would contribute towards the construction of it. One of the strongest arguments in favor of the project advanced in the House of Commons was that there is no national highway communication above the head of the Great Lakes and that transportation by waterway is still the chief method of carrying goods throughout the country. A year ago Mr. King estimated the cost of a national trans-continental highway at 200 million dollars, but Dr. Manion suggests that the link above the Lakes might be completed for 5 or 6 millions. His suggestion that the Dominion might very well co-operate with Ontario regarding the cost seems not unreasonable. Dr. Manion put the matter to the test. "There is no question regarding the building of national and provincial highways, that the provinces are in perhaps a rather difficult position to undertake alone the building of a national highway. Take, for instance, across the northern section of Ontario extending from Sudbury to the Manitoba boundary, an area nearly as large as Germany and France put together, with a population of only 200,000. This sparse population requires branch roads and a large amount of road-building to be expended in the construction of branch colonization and settlers roads. Therefore the provincial government should not be expected to build the whole of this national highway across that section of Northern Ontario. That, after all, is the only section remaining to link up these different roads which could be, for the time being at least, turned into a trans-Canada or a Canadian national highway. However, because of the demands of the provinces, it is particularly necessary, if the road is to be built, that the Dominion Government should take part in the work. The Dominion Government should also take part in this road-building from the national aspect of linking up the east and the west."

People Make Living From Watercress Beds

Plant Grows In Profusion In Picturesque English Village

Motoring between Henley and Teddington recently, says a writer in the London Evening News, I came for the first time upon Wimborne Minster. It must be unique in England. Its name is Evelyn, pronounced Yeweline. A stream as clear as crystal runs down the middle of the village street, and watercress grows in profusion in it. Rustic bridges cross the stream and lead up to the cottage gardens. Further broad expanses of watercress beds lie beyond the cottages, and the occupants make a living from watercress.

Not What He Meant

To attract the custom of the foreign Japanese tradesmen often put up signs in what they consider to be idiomatic English. Such signs contain amusing mistakes. One of the funniest is that exhibited by a Japanese baker in Tokio; it reads:

"A. Kashimura, Biggest Loafier in Tokio."

"Why didn't I see you in school this morning?"
"Because I wasn't there." — Monique, Charleroi.

Drowsiness is dangerous.

Weary miles seem shorter
and the day is brightened when
you have Wrigley's with you.It sugar pep's you up. Its

BRIEFLY TOLD

Dr. Charles Camsell, deputy minister at Ottawa, was chosen to head the Royal Society of Canada for the next year.

Since removing of embargo on export of precious metals in January, the amount of gold shipped from Japan totals about \$450,000.

Bert White, 77, leapt from an airplane 25,000 feet above Lancaster, California, and made a safe landing in an attempt to make a record parachute jump.

Construction of a 1,500 mile elevated electric railroad across the Sahara Desert is under discussion in Paris. The estimated cost is \$117,000,000.

William Chalmers, of Vancouver, "B.A." and "M.A." graduate of McGill University, has been awarded the Governor-General's silver medal for graduate research in chemistry.

Hon. Dr. J. H. King, Dominion Minister of National Health, is the new president of the Canadian branch of the St. John Ambulance Association. He succeeds Senator Bertin Bostock.

Mrs. Betty Carpenter has bought a whale boat building yard at Coves, England, in order to secret the details of a speedboat she is building in the hope of capturing the world's speedboat title.

The Senate has passed more divorce bills during the present session than in any other year during the past ten years, if not since Confederation. It was revealed in a report submitted recently by Hon. A. B. Copp, vice-chairman of the divorce committee.

James Smart, District Inspector of Dominion Forestry Services, with headquarters at Prince Albert, Sask., has been appointed superintendent of the Riding Mountain National Park, in Manitoba. The appointment was announced by Hon. Charles Stewart, Minister of the Interior.

Service Becoming Popular

Passenger Are Using Telephone On Canadian National Trains

Since the installation of telephone service on the Canadian National trains, there has been an average of six calls a trip, between Montreal and Toronto, and in the other direction, according to W. D. Robb, vice-president, in whose department the service comes. Most of them have been from the train to Montreal, Toronto, Kingston, Oshawa, Hamilton, London, and other points, one being made to Ashville, New York. Several have been made to the moving train from outside points.

Colonel Gustavo Leon, noted Mexican aviator, will attempt in May to follow the Lindbergh air trail across the Atlantic, if efforts to finance the venture are successful.

One of life's little ironies is found in the fact that a fifty-dollar telephone pole can so completely demolish a \$3,000 motor-car.

Ireland Only Country
Without War Memorial

Money Subscribed But Political Feeling Has Barred Erection

Of all the countries that took part in the Great War, Ireland is the only one still without a National Memorial to her dead. The money, some £50,000 has long since been subscribed, but political rancour has all along thwarted the objects of the subscribers. It is felt by a great body of Irishmen abroad as well as at home, that a National tribute to the 60,000 Irish soldiers who fell in the War should occupy one of Dublin's best central positions. Political feeling, however, has rendered this impossible, and all the assistance that the Free State Government has given in the matter has been to offer a site beside a little-used roadway some miles beyond the city boundary. This proposal the Memorial Committee naturally rejected, and it is quite possible, that if an alternative to a central city site a prominent place in Phoenix Park cannot be obtained, Belfast may be asked to find a position worthy of the Memorial.

Winnipeg Newspaper Union

(By Anabelle Worthington.)

A tiered model in printed silk crepe reflects a new note in modified Princess styling, which makes it suitable for the everyday wear.

The tiers show a downward curving tendency at back, a clever means of lengthening the silhouette. They are finished with a top row of novel fabric silk applique band that ties in youthful bow at front.

The neckline in deep open V-shape is finished with a single applique band. Long sleeves also gathered into cuffs of the crepe with tab ends.

Design No. 3278 comes in sizes 18, 16, 14, 12, 10, 8, 6 and 4 inches bust.

The trimming bands work out nicely cut from the dull surface in crepe satin which is all important in soft wear.

Black silk crepe, plum shade in wool crepe, tiny self-checked pattern in both green feather weight wool, tones red and white of white crepe marocain in dahlia purple and navy blue. Faile crepe appropriate and charming.

Pattern price 25 cents. Be sure to turn in size of pattern. Address Pattern Department.

Advice For Farm Boys
The difficulty in securing work in the towns and cities abroad, will have a tendency to make young men more contented on the farm, and give them a desire to make improvements there that might ultimately put them on the road to better things. Farming is at the present moment it is no flatter than the trade in the towns and cities.

New Motor For Airplanes

May Solve Problem Of Ocean Flying Says German Authority

A tiny motor about as big as a beer bottle, with characteristics of both a black furnace and a refrigerator, may solve ocean flying, believes Dr. Paul Heylandt, liquid gas authority, will lead to development of a special type of aircraft-propelled plane which will shoot up 10,000 feet and travel at 650 miles an hour.

The motor, an elongated, pistol-shaped drum of hardest steel, is one-cylinder, valveless contraption devoid of pistons or other movable parts, into the front end liquid oxygen is sprayed, while into the further end, near the exhaust, liquid fuel, such as wood alcohol, benzine, gasoline, or even fuel oil is injected.

At the entrance points of both components into the motor there are spraying attachments which diffuse the liquids over the entire hollow inner tube. The liquid fuel is ignited as it comes in contact with the liquid oxygen. The result is an extremely steady combustion which produces a recoil of 220 horse-power with a motor of only 11 pounds. The best German automobile motors produce only about half a horse-power of propulsive energy per pound.

As the two components explode, they emit a steady stream of smokeless, scorching fire about a yard long. The noise is deafening, and easily greater than that of the 2 motors of Dornier's "DO-X" combined. The heat at the exhaust is such that when Valley during one demonstration did not mix the two components correctly, the exhaust simply melted away. Cold produced by the liquid air is such that the conducting pipes accumulate a thick coat of frost.

"Our experiments with the rocket car are only a step toward our real goal, a motor for aeroplanes intended to go up into the stratosphere," Dr. Heylandt observed. "One essential thing is that both components are so separated as to avert all danger of explosion."

"The rocket car will never be a practical proposition except for racing purposes. Naturally, we police authorities could stand for a car making such a noise. As soon as possible, therefore, we want to experiment with a rocket 'plane.'

A Tribute To Nansen

Explorer Did Splendid Work After Close Of War

Fridtjof Nansen, when the war closed, was already fifty-six years old. Arctic exploration is a young man's game; he should be. Nansen's choice of the north, the north, the age of the "Fram," was already a quarter of a century in the past. He had won credit and fame as a scientist, educator, administrator of learned bodies. It could hardly have been supposed that his chief work still lay before him.

Nansen lived in a small country, a country neutral in the war. He was a natural choice, an ideal one as it proved, to head the great work of repatriation of war prisoners and the relief of hunger in civilian populations.

He drew himself into the work with all his splendid energy, mitigating to some extent the agony of millions of half-starving people. His work in Russia represented forty-eight Red Cross societies and twelve nations served as aid and precursor of Mr. Hoover's great task of relief which Russians remember with so much gratitude.

Nansen served Norway more particularly, but still in the pathway of peace, as its representative with the League of Nations. In 1924 while so serving he was instrumental in smoothing the way of Germany into the League. In 1923 the Nobel Peace Prize was awarded to him with unanimous honor was paid to him in the completion of his admirable body of literary work. His was the singularly useful career of a well equipped man whose talents and ideals exactly fitted the needs of the stirring times through which he lived.

Not Ashamed To Ask

"How is it that you have attained so high a degree of knowledge?" was the question once put to an Eastern sage.

"My son," answered the wise man, "my knowledge has come to me in a way that thou canst easily follow: What I knew not, I was not ashamed to ask about, and by this means have gathered much wisdom."

Many Areas Tested

Since beginning the testing of cattle for tuberculosis in 1915, a total of 1,469,769 animals have been tested, in Canada and 14 areas declared free of the disease.

DO YOU
SUFFER FROM
CONSTIPATION?

Countless remedies are advertised

for constipation, but relief for many is temporary and must be continued. Others contain calmed and dangerous mineral drugs, which remain in the system, causing pain, headache, aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Others are laxatives which only grease the intestines and encourage nature's machinery to become lazy. A purely vegetable laxative such as senna, which gently touches the liver, bile starts to flow (caused to stumble by what is to fall Me) this night: for it is written (Zechariah 13, 7). I will smite the Shepherd, and the flock shall be scattered abroad.

Then He added the encouraging words: "After I have raised up, I will before you into the fold." The Shepherd will yet again go before His flock, leading them.

"All shall be offended in Thee," verse 10. Peter had said, "What will the others do?"

"What wrung it? Even a torchlight and a noise. The sudden Roman faces, violent And fear of what the Jews might do just that.

And Jesus, written, "I forsake and flee."

There was my trial, and it ended thus—"Brownings."

Prepared as for white sauce. Stir in beaten egg yolks after sauce is cooked. Add the 1/4 cup butter bit by bit and finally the lemon juice. Pour over strips of cooked asparagus. Garnish with pimento.

The savory flavor of celery top greens blends well with roast fowl and dressing.

SALMON LOAF

1 tablespoon lemon juice.

Cayenne.

1 teaspoon salt.

1 lb. salmon.

2 small eggs.

1/2 cup chopped celery.

1/2 cups bread crumbs.

1/2 teaspoon baking powder.

1/2 cup evaporated milk.

Add lemon juice, cayenne, then beaten eggs, celeri, bread crumbs, baking powder and milk. Shape into a loaf and place in an oiled baking pan. Bake in moderate oven (350 degrees Fahrenheit) until brown and firm. Serve with medium white sauce or egg sauce. Yield: 5 servings.

Dairying and Milking

The annual value of Canadian dairy products—\$297,626,000—is a few dollars less than the annual value of the mineral production of the Dominion. A total of 286,000 farmers supplied milk and cream to the 2,833 dairy factories throughout the Dominion last year.

Pedestrians who cross the streets recklessly in Berlin are to be prosecuted. After they come out of the hospital, probably.

A Fecular Accident

When the parachute worn by a mechanic flying in an army plane was accidentally opened, the mechanic was pulled into the air, smashed against the tail of the plane, and pilot and mechanic were killed when the machine fell into the sea.

Orcids priced at \$500 a plant were recently exhibited in London, England.

SUNDAY SCHOOL LESSON

JUNE 8

JESUS IN THE SHADOW OF THE CROSS

Golden Text: "He went forward a little and fell on His face, and prayed saying, 'My Father, if it be possible, let this cup pass away from me; nevertheless, not as I will, but as Thou will.'" —Matthew 26:39.

Lesson: Matthew 26:1-7.

Devotional Reading: Psalm 42:1-5.

Explanations and Comments

Peter's Denial Foretold, verses 31-32. On the way Jesus said, "All shall be offended by Me (caused to stumble by what is to fall Me) this night: for it is written (Zechariah 13, 7). I will smite the Shepherd, and the flock shall be scattered abroad."

Then He added the encouraging words: "After I have raised up, I will before you into the fold." The Shepherd will yet again go before His flock, leading them.

"All shall be offended in Thee," verse 10. Peter had said, "What will the others do?"

"What wrung it? Even a torchlight and a noise. The sudden Roman faces, violent

And fear of what the Jews might do just that.

And Jesus, written, "I forsake and flee."

There was my trial, and it ended thus—"Brownings."

Never said Peter, but it will happen this night," said His Master. Verily I say unto thee, that this night thou shalt deny Me thrice." Again Peter protested his loyalty and added, "Even if I must die with Thee, yet will I not deny Thee." Likewise, Jesus said all the disciples.

In Gethsemane, verses 35-46. Jesus and His eleven disciples to the Garden of Gethsemane, retracing for the last time His oft-repeated journeys thither for seasons of prayer and meditation. "Sit ye here," He said to the disciples, "while I go yonder and pray." And He began to be sorrowful and troubled, and a sweat dropped down His brow. "My soul is exceedingly sorrowful, even unto death." Before this He had talked calmly with His disciples and said, "The spirit indeed is willing, but the flesh is weak." Likewise, Jesus said all the

disciples.

When the soul enters its Gehenna, it withers and stirs not from its most trusted friends." Jesus went forward a little, and falling on the ground prayed that if it were possible it could be otherwise. "Nevertheless," He said, "not as I will, but as Thou wilt."

When the soul enters its Gehenna, it withers and stirs not from its most trusted friends." Jesus went forward a little, and falling on the ground prayed that if it were possible it could be otherwise. "Nevertheless," He said, "not as I will, but as Thou wilt."

BRITISH FIRMS PLAN TO MAKE CARS IN CANADA

London, England.—British automobile manufacturers are preparing to invade the Canadian market. They propose the establishment of assembling and manufacturing plants backed by aggressive salesmanship; it was learned at the Chambers of Commerce Congress.

Canadian delegates submitted three principal points:

(1) That Britain should imitate the example of the United States by providing, as far as possible, for manufacturing plants in Canada and that the most effective way of meeting to do this competition in Canada was to take their courage in their hands and put up manufacturing plants in Canada.

(2) The necessity of having in Canada centres for assembling where organizations could be developed for the provision of spare parts.

(3) The necessity of more aggressive salesmanship. Reporting to Congress, P. J. Hannan, the chairman of bilateral discussions, said he had received a letter in which they said they were prepared by co-operation and co-operation to make a really concentrated attack upon Canada through more highly organized methods of advertisement and publicity.

They were also preparing to furnish service and spare parts for their motors so that the Canadian owner would have no more trouble with his British car, in effecting replacements and repairs, than with the American product.

Calling Conference On Employment

**Mayors Of Western Cities Will Meet
In Vancouver**

Vancouver, B.C.—To organize a western Canadian movement toward solution of the unemployment problem, Mayor W. H. Malkin is arranging for a conference of mayors of western cities here about June 9.

On that date Mayor R. H. Webb, of Winnipeg, will arrive here with a party of prominent Manitoba men to welcome the French line vessel, "Winnipeg," at this port. Mayor Malkin telephoned him suggesting that other western mayors might be asked to come to Vancouver then for a conference on unemployment.

Will Continue Coal Rates

**Extension Granted On Alberta Coal
For Another Year**

Drumheller, Alberta.—Eastern freight rate on Alberta coal, reduced a few years ago to aid the marketing of western coal in the east, will be continued for another year.

A wire to this effect has been received here from E. J. Garland, U.F.A., M.P. for Bow River, who stated that after making instant demands for this extension the government agreed to have an order-in council passed forthwith.

Prince May Unveil Statue

London, England.—The London statue of Marshal Foch is about ready, and the Prince of Wales has consented to go to the British capital to unveil it. It is officially stated that the memorial will be erected on the triangular piece of ground near Victoria station, facing the Hotel Belgrave. The French sculptor, Malisard, will carry out the work. The statue will be an exact replica of the statue which stands at Cassel, and which, modelled from life, had the approval of the Marshal.

Want Action On Survey

Ottawa, Ont.—It is highly advisable that both the Canadian National Railways and the Canadian Pacific Railway undertake a joint survey of the proposed trans-Canada highway. It is not done within a year than the present administration, if returned to power, will take steps to have such work begun, declared the prime minister, Mackenzie King, in the House of Commons recently.

Extending Air Service

Tokyo.—In order to offset curtailment of Japan's maritime fighting units resulting from the agreement reached at London, England, the navy ministry here is planning to extend the nation's air services on a vast scale.

The largest American-made water wheel weighing 150 tons, is being built at Newport News.

W. N. U. 1840

Over Seven Million Paid In Pensions

Dominion Government Contributed Nearly Four Million To Pensions

Ottawa, Ont.—The Dominion Government has contributed a total of \$3,771,349.65 to the provinces in aid of old age pensions, up to the end of last fiscal year, according to a return tabled in the House of Commons. The disbursements to the 42,553 pensioners throughout Canada amounted to \$7,399,122.

Following is the distribution by provinces: Alberta, 2,017 pensioners, \$2,067,420.04 total paid; British Columbia, 4,576 pensioners, \$2,049,674.52 total paid; Manitoba, 5,104 pensioners, \$1,649,295.67 total paid; Ontario, 26,370 pensioners, \$2,225,688.32 total paid; Saskatchewan, 4,482 pensioners, \$1,139,942.82 total paid; North-West Territories, 4 pensioners, \$557 total paid.

The apparent disproportion between pensioners and total payments is due to the shorter period in which the various provinces. British Columbia was the first to adopt the act. Ontario the last. Consequently the disbursements to British Columbia have been in progress for a much longer time than to Ontario.

Fire In Alberta College

Main Building and Boys' Dormitory Were Destroyed

Lacombe, Alberta.—Fire, which broke out in the Catholic Junior College here, destroyed the main building and boys' dormitory. The loss is estimated at \$100,000.

Five boys, who with some 200 others escaped in their night clothes, received burns and were taken to the Lacombe hospital.

The college is the only Adventist institution of the kind in western Canada. There were three buildings on the site, the other being the girls' dormitory, which was saved. Erection of the structure was carried out some 20 years ago.

Canadian Nurse Killed In Italy

Car Left Road After Collision Plunged Down Ravine

Florence, Italy.—Miss Helen Gee, 22, a United States girl, whose home is in Denver, Colo., and Miss Ruth Henderson, 32, a Canadian nurse, employed in John Hopkins Hospital, Baltimore, Md., were killed in an automobile accident near Ronca, 48 miles from here.

The accident in which the two women were travelling collided with another automobile, left the road and plunged 250 feet down a ravine. The car was loaded with suit cases which showed that they were touring Italy.

Wilkins May Accompany Dominion Expedition

Famous Explorer Has Permission To Go To Arctic

Ottawa.—Sir Hubert Wilkins may accompany the 1930 Arctic expedition, sent out annually by the Dominion Department of Interior, through its northwest territories and Yukon branch. It was reported that the famed Australian explorer and scientist had the permission of the department to join the expedition, which will travel north of the S.S. Beothic, and which leaves North Sydney, Nova Scotia, towards the end of July.

Mounties Leave For England

Compete In International Horse Show At London

Ottawa.—A detachment of Royal Mounted Police to compete in the forthcoming International Horse Show at Olympia, London, sailed from Montreal on May 29. Major T. Dunn, senior ranking inspector of Canada's celebrated force, is in command. The riders and their mounts have been put through a strenuous period of training in a Regina and Ottawa.

Sound "Last Post" For Aviator

Ottawa.—"Last Post" was sounded and musketry rattled with the "present arms" of the firing party as a train pulled out of Union Station bearing the remains of Flight-Sergeant Robert W. Pike to Vancouver. The body of the young flyer, killed in an aeroplane crash here, May 27, will find a last resting place in his native city of British Columbia.

Plans Westward Atlantic Flight

Dublin, Ireland.—The first attempted westward crossing of the Atlantic by plane, probably will be made by Capt. Charles E. Kingsford-Smith, pilot of the Southern Cross on its California-to-Australia flight, at the end of June, he said here.

Smelter For Far North

To Operate In Copper Mines On Great Slave Lake

Edmonton.—Within another 18 months a huge oil-burning smelter will be going full blast on the southeast corner of Great Slave Lake, turning the deposits of rich copper ore of this region into ingots to be transported to the markets of the world through Edmonton, according to Mr. A. C. Hardy, president of the Alberta Exploration Company, the Consolidated Smelters and Ventures, Limited, generally recognized as the three most powerful mineral development companies in Canada.

Gift Of Conservative Members

Huge Loving Cup Presented To Hon. R. B. Bennett

Ottawa.—With members and senators thronged in the party caucus room of the House of Commons, Conservatives presented their leader—Hon. R. B. Bennett—with a huge loving cup. Taken entirely by surprise and visibly moved as the two oldest of his supporters in point of years, R. S. White and W. A. Black, made the presentation, the Opposition chieftain spoke feelingly in expressing his thanks.

AMOUNTS PAID ON SUBSIDIES ARE ANNOUNCED

Ottawa, Ont.—Further information of the amount of money paid by the Dominion Government to the provinces was given to the House of Commons by Hon. C. A. Dumpling, minister of finance, in reply to questions from F. G. Sanderson (Liberal, Perth Sound). It sets out the amounts which will be paid to the western provinces by way of subsidies after the agreements with the prairie provinces for the transfer of the natural resources and the agreement with British Columbia for the transfer of the railway belt and the Peace River belt shall have come into effect. The payments will vary according as the population of the provinces increases.

The annual subsidy to Saskatchewan on the basis of the present population of 859,000 will be \$2,063,295. When the population reaches 1,200,000 the subsidy will have increased to \$2,710,375. The subsidy to Alberta at present will be \$1,670,435. When the population reaches 900,000, it will be \$2,015,375. The subsidies to 1,200,000 will be \$2,710,375.

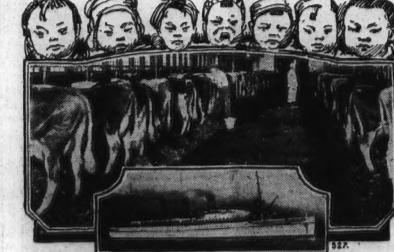

On the basis of its present population, Manitoba will receive \$1,662,048.18 annually. When the population reaches 800,000, this will have increased to \$1,991,584.18, and when the population reaches 1,200,000 there will have been a further increase of \$2,686,584.18. In the intervening years the total payment will vary according to population.

British Columbia on its present population will receive an annual grant of \$738,516.66. This per capita grant will increase as the population grows. The amount for the government and legislation will also increase from \$190,000 to \$220,000 when the population exceeds 800,000, and to \$240,000 when the population exceeds 1,500,000.

Some War Books Criticized

Edinburgh, Scotland.—Some modern war books are described as "vile and execrable exploitation of those who lost kin in the war," by the Rev. John Calder, Campbelltown, at the Assembly of the Free Church of Scotland. "These books," said Dr. Calder, "constitute a libel on the army and a calumny on the heroic dead."

Saves Babies In China

Vancouver cows have become the foster mothers of children in China and Japan. Fresh certified milk is now being carried from Vancouver to the furthest ends of the earth, since New York, Montreal, Australia, South America and London, England, have already been supplied from the British Columbia port. Scientific refrigeration on the big white liners of the Canadian Pacific fleet plying between Vancouver and the Orient, is half the secret of the success of this long distance delivery of fresh milk; the other half is the quality of the product from the Brookbank Laboratories.

ies certified milk farm. Carrying milk, as fresh as when it came from the cow, from Vancouver to Shanghai, a distance of 5,419 miles, is a big job and even the speedy "Empress of Canada" took 14 days to turn the trick, counting in stops at Honolulu, Yokohama and Kobe en route.

W. F. Jones, manager and proprietor of the Brookbank Laboratories, has a theory that the cow which feeds the child has a right to the same treatment and attention as the child's mother, and above lay-out will show something of the careful grooming and spotless cleanliness of

stables and animals.

SPEAKER OF SENATE

Senator A. C. Hardy, Brockville, Ont., who has been selected as Speaker of the Senate. The selection will be immediately confirmed by the government.

PASSES HOUSE OF COMMONS

Contributions From Companies For Campaign Purposes Allowed By Election Act

Ottawa.—The new Dominion Election Act was finally passed by the House of Commons after an amendment by J. S. Woodsworth (Labor, Winnipeg North Centre), had been accepted.

The amendment repeals a section prohibiting contributions from oil companies. Mr. Woodsworth claimed that this provision worked a hardship on labor unions desirous of making contributions while large corporations had been able to contribute despite the section. The effect of the passing of the amendment is interpreted to mean that contributions to campaign funds from unincorporated companies and organizations will be subject to no restriction.

Senate Approves Grain Act

Given Three Readings and Passed Within Few Minutes

Ottawa, Ont.—Approval was given by the Senate to the consolidated draft of the Canada Grain Act which was prepared by a special committee of the House of Commons, during the space of a few minutes. The bill was introduced by Hon. Raoul Dandurand, government leader, given three readings and passed.

Senator A. B. Gillis protested against the bill before introduced so late in the session, making a careful study of it practically impossible. If this practice were followed all the time, the Senate would be "nothing but a rubber stamp" for the Commons, he said.

Operating On New Time

Prairie Air Mail Making Use Of Additional Daylight

Winnipeg, Man.—The new schedule for the Western Canada Prairie Airmail service went into effect May 27, when the plane carrying the mail for eastern points left Stevenson airport at 7:30.

A careful survey has shown the greatest difficulty in operating the service, due to meteorological conditions, to exist on the leg of the route between Winnipeg and Regina, and particularly at the Winnipeg end, Mr. Coolican said.

Making use of the additional hour and a half of daylight is expected to better the percentage of effective performance.

GRAIN MOVING STEADILY FROM HEAD OF LAKES

Montreal, Que.—The Montreal Star gives the following dispatch from London, Ont.

"Commenting on advice from Montreal that a big amount of export grain is an immediate problem, Mr. Ursell, chief statistician of the Board of Grain Commissioners, said the announcement was not unexpected.

"He said European buyers were commencing to take Canadian grain, and he looked for a brisk movement in June and July.

"The situation has greatly improved during the last two weeks, he said. He expected shipments from Port Arthur and Fort William to run from 13,000,000 to 20,000,000 a month, which would mean a carry-over considerably less than last year.

Port William, Ont.—The Head of the Lakes movement in the past four days and a great improvement in export conditions on the Atlantic seaboard are noted by E. A. Ursell, statistician to the Board of Grain Commissioners, commenting on reports from Montreal that a big movement of export grain is an immediate prospect.

Mr. Ursell points out that liner tonnage has been taken up with wheat, and five tramp vessels are now at Montreal to take on wheat for Mediterranean ports, which of itself, he says, is a very satisfactory condition, showing that there is a demand for wheat in large quantities among the continental European buyers.

"It is reported that 5,000,000 bushels of wheat were exported during week of May 19 to 24, and 4,000,000 the week before.

"Should the export movement continue for the next two months at the present rate," the statistician adds, "the carry-over of wheat in Canadian channels is not likely to be more than \$6,000,000 bushels, as was indicated in a report issued four months ago by the statistician's office of the Board of Grain Commissioners.

CONFERENCE ON UNEMPLOYMENT WILL BE HELD

Ottawa, Ont.—It is proposed to make the interprovincial conference on unemployment which may be held this year as representative as possible. Premier King stated in the House of Commons. The government had placed an appropriation of \$10,000 in the supplementary estimates to enable the conference to be held. Representatives of labor, the transportation companies, and other large employers would be invited.

The Premier made his statement in reply to a question from A. A. Heaps (Labor, Winnipeg North), as to whether the conference would be held in preparation for the conference. Mr. King stated, the government had taken into consideration the considerable seasonal unemployment which existed in Canada.

It was thought the conference could devise arrangements for providing continuous employment throughout the winter months for a larger number of men.

The conference would consider all matters relating to employment and unemployment. This was the Premier's reply to a question from Mr. Heaps as to whether the matter of unemployment legislation, especially the eight-hour day would be taken up.

Winnipeg, Man.—Mayor Ralph H. Webb will represent Winnipeg at a special conference on unemployment at Vancouver on June 9, he announced. Mayors from other Western cities will also be in attendance, he said. He had received advice from Saskatoon, Regina, Edmonton and Calgary, that mayors of these cities will participate in the conference.

"As far as I can see," Mayor Webb declared, "this unemployment situation is getting worse and there doesn't seem to be any immediate source of relief."

Relieved Of Indebtedness

Soldier Settlers To Have Thirty Per Cent. Cancelled

Ottawa, Ont.—The government bill to relieve all soldier settlers of 30 per cent. of their indebtedness to the country, was passed by a Senate committee without amendment. The bill was introduced by a special committee of the House of Commons during the present session.

Under it the 12,000 soldier settlers in Canada will be relieved of capital indebtedness amounting to about \$11,000,000. The total amount owing the government under the scheme was set at \$38,000,000 and Hon. Charles Stewart, under whose department falls the administration of the act, said he was reasonably satisfied payment would be made of the remaining \$27,000,000.

Young Aviatrix Killed

Motor Stalls and Girl Fall Two Thousand Feet

Colorado Springs, Colo.—One of America's youngest aviatrices, 17-year-old Margaret Ferguson, fell 2,000 feet and was killed, while attempting desperately to start her stalled motor.

Miss Ferguson obtained her government pilot license only a few days ago. She was making a solo flight before attending her high school class when an accident occurred.

The motor was hard to restart once during the 2,000 foot plunge, but sputtered and died again.

Forced Natives To Work

Windhoek, Southwest Africa.—Three young Europeans charged with kidnapping natives and forcing them to work on their plantations under pain of the lash, were found guilty (about \$25) each. The sentences were light in view of the youth of the three men.

Looking For Settlement Land

Montreal.—In search of new land for settlement, a group of French-Canadians, from the provinces and of the United States will leave for the west toward the end of June from Montreal and Quebec by the Canadian National Railway.

Administration Is Coasty

Ottawa.—Expenditures for the administration of the opium and narcotic drug act have increased since 1926 from \$27,452.59 to \$62,110.83 in 1930, according to a return tabled in the House of Commons here.

Cheif Scout Re-Elected

Ottawa.—His Excellency the Governor-General was re-elected as chief scout for Canada at the annual meeting of the Canadian General Council of the Boy Scouts Association.

Canada Is Being Careful

All Immigrants Must Pass Medical Examination Before Being Admitted.

We are accustomed to thinking of immigration as a sociological and economic problem. Seldom do we realize that it is primarily a problem of social hygiene—a problem of the physical, mental and moral health of our country.

It is obvious that the population of Canada can only grow in two ways—first, by the natural increase provided by native births. And second, through immigration. Generally speaking there is little danger that native Canadians will fail to absorb Canadian ideals, and receive Canadian training. Our educational system takes care of that. But our educational system does not take care of the adult immigrant—the stranger within our gates who intends to become our adopted brother.

And because there are all kinds of people in the world, we have to be careful whom we admit to brotherhood. We have to make certain that the immigrants who are permitted to come to Canada will not bring a tainted heritage to our country. We have to make certain that they are healthy.

We have already pointed out in a previous article, how improper housing gives children rickets, and rickets makes children bad-tempered and spiteful, and that when they grow up they are almost bound to show the effects of this time of their life when they were in ill-health by their attitude towards their fellowmen.

The practice of having undesirable citizens is seen from the fact that during the years 1924, 1925, 1926, there were over 3,000 foreign citizens in Ontario alone, who were public charges. Under the present system, this situation will be greatly improved. It is Lloyd George who said, that you "can't raise an A nation on C3 citizens."

If we bear this epigram in mind, the future of Canada will be a shining mark in the pages of history. Before going into detail regarding Canada's system of safeguarding her national bloodstream by carefully handicapping immigrants, let us consider some of the off-shoots of ill-health. And, by the way, if we think of each prospective immigrant as a blood-corpuscle seeking admission to our national blood-stream, we may get a clear picture of the importance of careful selection.

First of all, let us consider crime. Crime in many cases, is an indirect consequence of ill-health. Mental health, physical sickness, and with crime goes its cousin, poverty. How often do social workers see the progress of a man or a family from sickness to prison! A father takes sick, and becomes a chronic invalid or dies. His children, dependent upon charity, are undernourished and underprivileged. Their mother, struggling to support them, has little time to spare to bring them up in the way they ought to go. They are undisciplined. As children they join gangs. And when they grow up the gang has remained with them. Unemployment they have seen, since they have seen poverty, they have seen; crime is the almost inevitable development in many cases.

We have seen in the United States what happens when the flood-gates are opened and thousands of immigrants pour through them. Great prosperity comes, as it came to Uncle Sam, but with that prosperity comes other disadvantages. The crime situation is rather difficult to handle, as witnesses Chicago with a murder a day.

We don't have a murder a day in the whole of Canada, for which heaven and wise laws are praised. Expensive machinery has been set up on either coast, with Ottawa as the headquarters, to see to it that the crime angle or any other difficult feature of bringing new citizens to the country, does not get out of hand.

"Why do you want to sell the piano so cheap?"
"My daughter is nearly old enough to have music lessons." —Munich, Vienna.

We are, in other words, hand-picking the people who are going to have the privilege of living in this fair land of ours.

So you see immigration is "primarily" a health problem. Canada sees that.

Local authorities carry out a most rigid physical examination of every immigrant who enters the country. We have doctors in some countries who examine the prospective citizens before they leave their native land. Even after that, some of the people are turned back because of some defect which either developed on the way over or went unnoticed during the examination. The government of this country takes no chances of unsound and unwelcome guests entering our gates.

But when the hand-picked ones who do not pass the eyes of the authorities, come to the point of establishing their new homes in our country, many problems arise.

They are subject to more sickness than the native-born, and they have less money with which to safeguard themselves. In the United States, where they have had greater opportunities of studying the questions which arise from increased immigration, it has been found that about forty-six per cent. of all admissions to state mental hospitals were foreign born.

It has been found that 70 to 80 per cent. of all Italian children have rickets.

But do not think that the problem resolves itself into anything so simple as making it difficult for people to come to Canada to live. In fact, the very reverse is desired. The Canadian Government are so anxious to have right kind of immigrants, that great sums of money are spent annually to bring them here. It is "the right kind of immigrants" only, that are wanted.

A total of twelve-million dollars has been spent during the past five years upon immigration projects for Canada. During that time 573,864 new citizens have been introduced to the country. Naturally, it is in the interest of all of us, as Canadian citizens, that this influx should include not only the perfectly healthy. To this end, the Canadian Government in its wisdom has found that the most expeditious way of operating is to have these immigrants examined before they embark for Canada. At this stage they are placed on a ship, on their passage, on deck, on their beds, as well as, in their rooms, with dinner every day for the rest of his life. He did this for two years. Then they quarreled and he refused to provide any more meals. On the ground that an important condition of the sale was not fulfilled, Ceepi started a law-suit to annul the sale of the house. The defense was that the provision of dinner was an act of charity and was only stopped because of Ceepi's behaviour. Only recently has a decision been reached—in favor of Ceepi. The restaurant-keeper has been ordered to pay for all the dinner he omitted to provide since 1922, and to see that they are furnished in the future.

Six among the immortal signers of the Declaration of Independence were physicians.

Require Mineral Matter

Lack Of It In Feed Is Serious Impediment To Growing Pigs

A problem in the mineral supply of feed to hogs in certain parts of the Western provinces has been investigated by the Livestock department of the University of Alberta, and in view of the unusual condition of the crops there, the conclusions drawn from many experiments carried out at the university are of special interest. The problem is caused by the low and constant rate of both the grown grains and the scarcity of dairy by-products. Oats and barley do not appear to contain sufficient mineral matter for growing pigs and probably 50 per cent. of the pigs raised in Alberta do not get any skim-milk or buttermilk. The main conclusions which may be drawn from mineral feeding experiments conducted at the University are:

1. Simple mineral mixtures may be used to advantage in reducing the time required to put pigs on the market, and in reducing feed costs when combined protein and mineral supplements are fed and tankage, etc., not being fed.

2. It would appear that when the protein requirement of pigs which have been properly carried over the critical weaning period and weigh around 50 pounds, is taken care of by a pasture crop, the most serious impediment to normal growth is likely to be mineral deficiency in the ordinary grain ration.

Must Carry Out Condition

Budapest Restaurant Keeper Ordered To Supply Meals With Dinner Every Day

When in 1920 a restaurant-keeper in Budapest bought a house for a comparatively small sum from a man named Andrew Csepel, he undertaken to provide the restaurant keeper with dinner every day for the rest of his life. He did this for two years. Then they quarreled and he refused to provide any more meals. On the ground that an important condition of the sale was not fulfilled, Ceepi started a law-suit to annul the sale of the house. The defense was that the provision of dinner was an act of charity and was only stopped because of Ceepi's behaviour. Only recently has a decision been reached—in favor of Ceepi. The restaurant-keeper has been ordered to pay for all the dinner he omitted to provide since 1922, and to see that they are furnished in the future.

Chief of Staff, Salvation Army, Visiting Canada

Commissioner Henry W. Mapp, London, England, chief of the staff of the Salvation Army, who will confer for a week with Commissioner Hay and other officers of Canada East territory.

History Dates Back Twelve Hundred Years

Irish Hermits First Inhabited Iceland

Iceland, one of the smallest of nations, but the greatest per capita exporting country, is making ready to entertain this summer in honor of the 1,000th birthday of her parliament, the first national legislature of the civilized world.

King Christian, of Denmark, who is also head of this independent monarchy, will be chief figure at the celebration, but all other leading nations will also be represented officially. King Christian will travel to Reykjavik on a Danish cruiser and will be accompanied by Queen Alexandra. Crown Prince Frederick, Prince Knud and other members of the royal household.

Iceland being considered one of the Scandinavian sisterhood, most of non-official visitors are expected to come from Denmark, Norway, Sweden and Finland. But special parties are also being organized in Canada, Great Britain, the United States, Germany, and the Netherlands. These visitors will be housed on their ships while here, neither the hotels nor private accommodations are available. There are only about 100,000 inhabitants in the kingdom—being adequate for such an influx of guests. The capital itself has a population of only 22,000.

While the Icelandic parliament, or Althing, first gathered on Thingvillir, or "place of assembly," in the year 930, the history of the country goes almost two centuries back of that. Irish hermits reached Iceland in 795 and found it uninhabited. About 860 A.D., a Norwegian Viking, Naddod, rediscovered the country and Gardar Savavarsson, a Swede, was driven by storm to its shores.

The first permanent settler was Ingolf Arnarson, a Norwegian. According to legend, he landed on the coast in the year 874, he cast overboard his high seat pillars and vowed to make his home where those symbols of permanency were washed ashore. He found them on the beach of what is now the harbor of Reykjavik and a statue to his memory by Einar Jonson, foremost Icelandic sculptor, has been erected here.

The country owes its commercial eminence to the fish in its waters and the sheep in its fields. Within the last few years, because of the exports, the only other sizable item being timber from the hills. The total is around \$13,500,000 yearly, something in the neighborhood of \$100 a month for each man, woman and child in the country.

There is no army or navy to support, but there are plenty of schools and a very low rate of illiteracy. The budget balances easily, the national debt is diminishing and the Gulf Stream continues to send its warm waters near the coast and modify the otherwise natural severity of the winters.

Acknowledged As Great Work

Bunyan's "Pilgrim's Progress" Holds Unchallenged Place In World's Literature

An aftermath of the John Bunyan tercentenary, which was widely celebrated throughout the world in 1928, has been the movement for the wider distribution of his great work, "The Pilgrim's Progress." This product of the seventeenth century has long held an unchallenged place of permanence in the world's literature, wholly apart from the theological controversies that attended its writing in jail by the author. "The book is the best popular treatise in every library, public and private, and it is extensively quoted far beyond the narrow field of propaganda in which it has a natural place.

In this connection it is of interest to take note of the movement to raise a fund for the wider distribution of the work, half of which is to be held as a permanent fund from which the income only will be used and half for further translations. The promoters of the movement state that the greatest advocates of that old "tinker out of Yarmouth" who has so powerfully influenced the minds and the imaginations of men.

Work for the Timekeeper

If the change in daylight saving time bothered you, think of the guardian of King George's clock at Windsor Castle, in England. He had to adjust 360 time-pieces of various makes and ages to the new schedule. Not even the first lever watch ever made, which was recently discovered at the castle, or the famous old clock in Curfew Tower, made in 1690, escaped.

Sixty thousand workers are engaged in the German porcelain industry.

Norway exported 46,500 tons of fish in a recent month.

France Has Big Air Program

Would Cover Half the World With Air Transport Lines

France seeks to spread a spider's web of air lines over half the globe. She wants a full share of peace time aerial traffic and she wants to train a great reserve of war time pilots.

France also desires to reach out her long maternal aerial arms to the colonies, across the Mediterranean, the Atlantic and some day into the Pacific. Just as she wants her navy to the seas, she wants her aeroplanes flying in the air lines that lead to every spot where France's 60,000,000 colonials live.

French aeroplanes fly now to Great Britain, Poland, all of southern and eastern Europe, to Africa and South America. Already there is a line as far east as Bagdad and pioneer work is being done to have regular mail service to Indo-China and Madagascar. The radial lines of a big part of the aerial web already are woven.

"France is well aided by her geographic position," says Emmanuel Emmanuel, chief of the General Direction of the air ministry. By that he means that French territory is spotted along many of the probable great air routes of the world. And he would build more airfields, light more lanterns and weather posts to make the lanes over France and French colonies the most desirable routes for foreign planes to take.

All these international roads, the ministry contends, must be bound together by a French domino effect, interests primarily to France, but also to have international lines. For France herself, it is felt that only long hauls will be profitable for some time. It is said that letters are written during the day and should be transported by night and as France can be traversed in a very few hours there is little advantage in sending by air what trains will deliver by breakfast.

Churchill Now Has a Police Magistrate

Manitoba Appoints Railway Official To Fill New Position

Evidence that Churchill is evolving slowly from a frontier encampment at the end of steel into a seaport town is seen in the action of the provincial government in appointing a police magistrate there. An order-in-council, signed by the Lieutenant-Governor, has named Ernest James Schofield, as police magistrate. Settlement at Churchill is not yet permitted by law, but a police magistrate is needed in the administration of justice among the men engaged in rail terminal and harbor construction works, who at present are the only inhabitants. Ill, and is reported to be well able, Mr. Schofield is not a lawyer, but a railway official now stationed at Churchill, and is reported to be well qualified to discharge his new duties.

Highest Spot In Alberta

Is Crest Of Mount Columbia On Western Boundary

According to the three-sheet map of Alberta showing elevations, published by the Topographical Survey, Department of the Interior, the highest point in the province is Mount Columbia on the western boundary. It is 12,294 feet above sea level. Indications are that the lowest point in the province is the bed of Slave River at Fort Smith, on the northern boundary, but this elevation not yet having been accurately determined.

A clay tablet telling of the fall of Nineveh has been dug up at 2,600 years.

There are from two to five eclipses of the sun each year.

Turkey expects good crops this year.

"I want a thousand live fleas."
"What for?"

"I want to move and my landlady says I must leave the room as I found it." —Pages Gaies, Yverdon.

"Why do you want to sell the piano so cheap?"
"My daughter is nearly old enough to have music lessons." —Munich, Vienna.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali is the same old standby—Genuine Phillips' Milk of Magnesia. It has remained the standard with physicians in the 60 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly all the acid as much as acid, and the symptoms disappear at once. You will never use crutches again when once you learn the efficacy of this. Get a small bottle to try.

Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—no druggist.

CHAPTER XV.

"Dinner is served, ladies and gentlemen," responded Charman, while the doctor, throwing her an appreciative smile, arose, and with the good manners Grandma had noticed on his arrival, offered his arm to the old lady.

School opened on the first of September. Charman was up early that morning, but when she came downstairs she found that her boarder had been earlier still. "The fire was burning brightly and the table set."

"Hello, Miss Schoolsman," he greeted her. "Thought you might be in a fluster this morning, and like an early bird. But you needn't get roused just because I'm going your way right after breakfast and can give you a lift."

"I don't believe you," said Charman severely. "I think you're just saying so to save me the walk."

" Didn't you hear the telephone ring at six o'clock?" he demanded in an injured tone. "Believe it or not, it was a bona fide call in your direction. Say! what can I do next? I've started the coffee, but I knew you'd suspect it wasn't right."

Charman laughed.

"You found me out. No one's ever allowed to make coffee out of the house, and then I'd appreciate your room more than your company. I'm excited, and likely to do some crazy thing if you divert me."

" Shall you be home at noon to see to Grandma?"

John Carter had begun taking his dinners at the hotel, and disliked them even more than Charman suspected. Her face sobered at his question.

" That's the one cloud in my sky," she admitted. "I really can't get back; and though I'll leave everything ready in the kitchen, I hate to have to go to work."

The doctor looked thoughtfully out of the window. He was to all appearances watching the Merry's Gypsys investigate an invisible mouse in the wood pile, but when he turned he said:

"Look here, Charman, why not let me come in at noon and help? We can eat here in the kitchen, and it would be less lonely for Grandma, wouldn't it? You can leave things half ready, and I'll do the rest. Of course there'll be days when I can't get here; but it would be better than having her eat every noon meal alone. On Saturdays and Sundays I'll

USES PINKHAM MEDICINES

Praises Vegetable Compound, Blood Medicine and Liver Pills

Birchtown, Quebec—"live 13 miles from town on a farm, with all my home duties and chores to perform. At the Change of Life, I became nervous, irritable, run down. The Vegetable Compound helped my whole system. My nerves were better, my appetite is good and I am able to do my work well. I have also taken the Liver Pills and they helped me. I will answer letters from anyone asking about your medicines."—Mrs. RICHARD CHARMAN, Birchtown, Quebec.

W. N. U. 1840

er would see that Jimmy Bennett thinks the world of you, wouldn't they, Doctor?"

John Carter, who was enjoying Charman's confusion, replied in the affirmative, and Grandma said: "The only drawback to Jimmy is his mother. She's a good woman, but terribly exacting, and she expects her boy to do just what she says. There are times when I wonder why he doesn't kick over the traces and rebel; but he's a good son, and he sees the funny side of things, too, and that makes him interesting. Many's the time he's run in to tell me a funny story time when he knew Charman was home, and that proves that he's got a kind heart. But he's not poetic, like Charman, and I've sometimes wondered..."

"Really?" broke in Charman, arising.

"Really," broke in Charman, arising, "though I know it's not polite to interrupt, I must start fixing your lunch. Grandma, or be late to school on my first morning. You and the doctor can take your time, but..."

She left the room, her sentence unfinished, and Grandma said: "I guess maybe she didn't want me to talk about her and Jimmy; and she's excited, too, beginning to feel the heat. All you go, and say and tell me not to bother with much of a meal for today. We'll eat the left-over's."

Charman returned that afternoon, tired but elated. Things had gone well; and she had met Doctor Howe on the way back, and ridden in with him.

"Between the two doctors I shan't get the exercise I need," she said to Grandma. "I mustn't let myself get fat as I get older."

"Fat!" snorted the old lady. "The Davises don't put on flesh. They're apt to go lean and spare in their old age, and your own people were the same. You needn't worry about getting fleasty like Little Baker. She eats too much, and she never walks if she can sit."

"Well, dear, I'm glad things went all right on your first day. And I got along real well myself. Lizzie Davis over to borrow some vinegar (she was making salad dressing); and Mrs. Merry stopped in for a spoon of cotton and stains an hour. The doctor warned us to eat real tasty, and we had as nice a dinner as I ever ate. He had another just as he finished doing up the dishes; and then he went to bed, and I went to bed, too."

"But..."

"There's no 'but' about it. Look here!" The doctor indulged in a bit of lightning calculation, and continued: "We'll split the difference if it makes you happier. I'm not likely to devour more than fifty cents worth of provisions. I'll pay you what I can afford."

"But you don't cook your own lunch, either," she broke in seriously.

"And I shan't here. I'll merely warm up the stews you leave, and keep that precious little old lady from being lonely. And you ask me to accept food in payment. I'm surprised."

"Well, dear, I'm glad things went all right on your first day. And I got along real well myself. "There's no 'but' about it. Look here!" The doctor indulged in a bit of lightning calculation, and continued: "We'll split the difference if it makes you happier. I'm not likely to devour more than fifty cents worth of provisions. I'll pay you what I can afford."

"But you don't cook your own lunch, either," she broke in seriously.

"And I shan't here. I'll merely warm up the stews you leave, and keep that precious little old lady from being lonely. And you ask me to accept food in payment. I'm surprised."

"Well, dear, I'm glad things went all right on your first day. And I got along real well myself. Lizzie Davis over to borrow some vinegar (she was making salad dressing); and Mrs. Merry stopped in for a spoon of cotton and stains an hour. The doctor warned us to eat real tasty, and we had as nice a dinner as I ever ate. He had another just as he finished doing up the dishes; and then he went to bed, and I went to bed, too."

"But..."

THURSDAY, JUNE 5th.

Crossfield Baseball Team Are Playing Real Ball

Crossfield and MacMinn broke even on their Sunday double-head here before the largest crowd of the season. With Scotty Lee on the mound the locals batted out a 7-3 victory in the first game, but lost the second 5-4 when errors behind Eaton lost the game. A collection of \$70.80 was taken up at the two games.

Crossfield won a league game from Didsbury on Monday night on the local diamond, when they squeezed out a 10 to 9 victory. The locals had Didsbury down 7 to 1 in the 7th inning, when things happened. Glen Williams went big until the lucky seventh, when he was touched rather freely and with numerous errors Didsbury had secured a two run lead, this however was overcome in the last inning when the Millionaires showed their class by pushing across two runs which did the trick.

Cold weather has been a big handicap to the ball clubs. Monday night was cold and raw.

On May 29th, the Church of the Ascension held an interesting service, when Harold Arnold High, son of Mr. and Mrs. Arnold High, and Audrey Marjorie, daughter of Mr. and Mrs. Earl Devins, were christened by the Rev. Adams-Cooper. Tea was served at the home of Mr. and Mrs. Mossop to a few of the friends who were able to be present.

Inverlea Notes

On Saturday evening quite a large number of neighbors and friends from surrounding districts gathered together for a "surprise" on Mr. and Mrs. Alex Fraser, who left here on Monday for their new home in Calgary.

During the evening Rev. H. Young expressed the regrets felt by all at the departure of Mr. and Mrs. Fraser from our midst, and asked them to accept a small remembrance from their many friends here. The gift was presented by Miss Mamie Stauffer. Mr. Fraser in a few well-chosen words responded for Mrs. Fraser and himself.

Mrs. Cowling returned home on Saturday from Ontario, where she has been for the past few weeks. Miss Aline DeWitt spent the week-end with friends in Balzac.

Kenny and Tom Borbridge were visitors in Calgary the first of the week.

Don't forget the Concert to be presented by the Calgary Girls' Pipe Band in the U.F. A. hall on Saturday, June 7th. A dollar concert for 50¢.

Auction Sale of household goods on Wednesday, June 11th at 2:30 p.m., between Johnson's Store and Mr. Ure's office. See posters.

The Tan-y-Bryn school play grounds have a nice swing added to its equipment, also basket ball and an indoor and outdoor baseball. Several farmers of the district turned out and helped to fix up the grounds by putting up the basket ball hoops, etc.

Card of Thanks
We desire to express our deepest appreciation to our many friends and neighbors, for all their kindness and sympathy extended to us during our sad bereavement.

R. M. McCool
U. F. A. Candidate in Cochrane District

Local and General

Mr. Dan McKay of Calgary was a visitor in town on Wednesday.

Mr. and Mrs. J. McCordle were visitors in Calgary on Monday.

Mrs. J. Robinson was a visitor in Calgary on Tuesday.

We will be glad to print any local news you may have.

BORN—To Mr. and Mrs. Jos. Verkuil on Sunday, June 1st, a son.

Mrs. H. E. Wray of Blackie, was renewing acquaintances in town on Sunday.

A. Stafford is enumerator for Crossfield Poll in Cochrane Provincial Electoral District.

Mr. and Mrs. R. Hutton of Calgary, spent Sunday with Mr. and Mrs. W. H. Miller.

Mr. and Mrs. Dave Patterson of Calgary spent Sunday as guest of Mr. and Mrs. R. M. McCool.

Ed. Springsteen and Frank Ruddy took in the races at Calgary on Wednesday afternoon.

Mr. and Mrs. Duncan of Bawlf spent Tuesday in town, visiting Mr. and Mrs. Cruckshank.

Mrs. Kliner and son and daughter of Vancouver, were the guests of Mr. and Mrs. A. Cruckshank on Sunday.

Mr. A. S. MacAulay of Turner Valley, spent the week-end at the home of his sister Mrs. W. A. McCormick.

Mrs. J. M. Williams and Mrs. Cruckshank and Florence were driven to Calgary and back on Saturday by Miss Grace Williams.

Glen Williams motored to his home at Bentley on Saturday afternoon and returned on Sunday afternoon.

Mr. and Mrs. H. R. Fitzpatrick and daughters spent the week-end in Camrose, visiting Mr. Fitzpatrick's brother.

Only a month till the Calgary Stampede. Hurry up, boys. See if we can't have some more cowboy champions from Crossfield. Entries close June 21.

Andy Duncan of Dog Pound, is confined to his room in the Oliver Hotel with a severe cold, and is now progressing favorably under the care of Dr. Whillans.

Mr. J. M. Anderson, Edmonton, was auditing the books at the U.F.A. last weekend. Griffiths pretty near had heart failure, but is recovering slowly.

A. W. Gordon is rural registrar for Crossfield Poll, for Calgary East Federal District. Sam Collins is the registrar for Elba Poll in the East Calgary Federal District.

Councillor Chris Asmussen is going around with the play ground fund subscription list. It is planned to secure all the money possible this week and order the swings, etc., forthwith.

The Tan-y-Bryn, Rural, Meadowside, Elba School districts will hold their Annual Field Day and Sports on the East Community grounds on Friday, June 6th, commencing at 10 a.m.

The D. Sinclair rink of Didsbury, winners of the Distributor Event in the local bonspiel, received their special prize of 50 Leghorn chicks, donated by Mr. F. Purvis and Mr. W. E. Spivey. The Didsbury curlers were pleased with their prize and are figuring on having a big feed this fall.

Tan-y-Bryn school play grounds have a nice swing added to its equipment, also basket ball and an indoor and outdoor baseball. Several farmers of the district turned out and helped to fix up the grounds by putting up the basket ball hoops, etc.

Card of Thanks
We desire to express our deepest appreciation to our many friends and neighbors, for all their kindness and sympathy extended to us during our sad bereavement.

Jess Havens and Children
Mrs. Larson and Family.

Baby Clinic, June 9th.

Under the auspices of the Floral U.F.W.A. Local, a Baby Clinic, will be held at W. D. McCool's on June 9th from 10:30 a.m. until 4 p.m.

Dr. M. G. Cody, Child's Specialist, and Miss Emmerson, R. N., will be in attendance.

Mother's in the community are invited to come and bring their babies and children up to 6 years of age to this free health examination.

Hockey Star Earns Degree at Marquette

Crossfield will be represented at the 1930 commencement exercises at Marquette University in Milwaukee, Wis., U.S.A. by Donald P. McFadyen, who is included among those who are candidates for degrees.

Young Mr. McFadyen, who was captain of the championship Marquette hockey team this season and who was selected as an all-American center, is to receive the degree of bachelor of philosophy from the Marquette college of liberal arts. He has not decided whether to take up the study of law next year or accept one of the many offers he has received to play professional hockey.

Marquette's commencement exercises this year will be held on Wednesday night, June 11, in the Milwaukee Municipal auditorium.

Donnie and his brother Hazel, both of whom are attending Marquette University are expected to arrive home about June 15th. This will be good news for the baseball fans, as it is expected both these boys will line up with the local team.

'HIT AND RUN' DRIVER FINED

A "hit-and-run" driver episode closed Wednesday last week at Crossfield, when Lake Parsons, driver, being fined by police Magistrate Scott. This completed investigation by the Alberta Provincial Police into an accident on the highway on April 17th, when near Didsbury, a Brewster bus was struck and damaged to the extent of about \$300, and another Brewster bus about 200 yards behind the first was forced to take to the ditch. Lake Parsons, freight carrier of Crossfield, was the alleged "hit-and-run" driver. He appeared before H. G. Scott, Police Magistrate of Red Deer, at Crossfield.

His Worship, in passing sentence on reckless driving charge, commented on the fact that the accused left the scene of the accident and did not report to the police. The evidence of the prosecution he said, was overwhelming. He was fined \$15 and costs amounting to \$65.65.

He was also charged with failing to return to the scene of the accident, and was found guilty on this count. His Worship told the accused that he was committing a very serious crime, but in view of the heavy costs he would impose only a light fine, \$5.

W. I. Meeting June 17th.

The Women's Institute will meet at the home of Mrs. Mobs on Tuesday afternoon, June 17th.

ROLL CALL—Hot Weather Dishes. Report the Convention will be given by Mrs. Fitzpatrick. Health Talk by Miss Gazeley Musical Selections.

Mrs. Boyce, District Convenor will attend this meeting.

Tennis Courts are Ready for Play

The tennis courts are getting into shape after the rain and with more rollings they will be better than ever.
